On behalf of Richard D. Hurt, M.D. and Sheila K. Stevens, we are pleased to announce our upcoming 21st Annual Nicotine Dependence Conference continuing education offering being held April 14-15, 2014.

We believe the 21st Annual Nicotine Dependence Conference will be an outstanding event providing substantial value to our colleagues. This course will focus on issues related to the treatment of nicotine dependence. External and internal speakers will discuss information related to the various types of tobacco products being used and their addictive potential. Medications currently being used to treat this dependence will be presented and expanded to address advanced strategies for difficult cases and special populations. We intend to provide participants with awareness and basic knowledge of these methods and their potential application in improving health care.
