State-of-the-Art
Thrombophilia

MARK YOUR CALENDAR

September 21–23, 2006
Phillips Hall
Harold W. Siebens Medical Education Building
Mayo Clinic, Rochester, Minnesota

Presented by:
Mayo Medical Laboratories
COURSE OVERVIEW
The objective of this first Mayo Clinic continuing medical education course on thrombophilia is to provide both clinically applicable and cutting edge material focused on the evaluation of patients who have arterial or venous thrombotic disorders. The course will refresh the basics and provide the latest information and philosophy on the evaluation and treatment of common thrombotic disorders, and also review specific aspects of uncommon thrombotic diseases. There will be an emphasis on clinically applicable scenarios and ample opportunity to ask questions and discuss difficult diagnostic or management issues.

The course brochure will be available early April 2006.

For additional information, contact Mayo Medical Laboratories’ Education Department by telephone toll free 800-533-1710, directly 507-538-6253, or fax 507-284-8016. Or visit us on the web at: www.mayoreferenceservices.org.

COURSE OBJECTIVES
- Recognize the optimal diagnostic strategy of venous thromboembolism
- Outline recent developments in stroke prevention and treatment
- Assess current management of patent foramen ovale (PFO)
- Determine the role resistance plays in currently available platelet antagonists
