Bleeding and Thrombosing Diseases
2006 Mayo Update

Coagulation Conference and Wet Workshop

Mark Your Calendar

August 2-4, 2006
The Kahler Grand Hotel
Rochester, Minnesota

Presented by:
- Mayo Clinic Division of Hematology and Internal Medicine, and
  Department of Laboratory Medicine and Pathology
- Mayo Medical Laboratories
Mayo’s 7th Coagulation Wet Workshop on Wednesday, August 2, is designed for laboratory technologists, physicians, and scientists who have responsibilities for diagnostic coagulation laboratory testing. Workshop participants will form teams for testing and evaluation of four to six “unknown” plasma specimens at seven workstations, using coagulation instrumentation, reagents, and technical specialists provided by commercial sponsors. Workshop faculty will lead a discussion of results and interpretation, including comments about the clinical disorders studied and the comparability or diversity of results and interpretations obtained with different instruments or reagents.

Mayo’s 12th Coagulation Conference on Thursday and Friday, August 3-4, is appropriate for clinicians, pathologists, scientists, and laboratory technologists whose practices include bleeding and thrombosing diseases. The conference will review and update laboratory and clinical aspects of bleeding and thrombosing disorders. Didactic presentations will be supplemented with case presentations and panel discussions. A special feature of this 2006 conference on Friday, August 4, will focus on presentations summarizing current concepts of the pathophysiology, diagnosis, and management of von Willebrand disease (VWD).

The course brochure will be available in March 2006.

For additional information, contact Mayo Medical Laboratories Education Department by telephone, toll free 800-533-1710 or directly 507-284-0286, or by fax 507-284-8016.
