The content discussed will:
- Review indications for S-ICD therapy
- Identify which patients are best served with S-ICD therapy, and which are best treated with transvenous ICDs
- Review anatomy germane to S-ICD implantation
- Discuss the pre-procedure screen for S-ICD implantation
- Provide a step-by-step approach to S-ICD implantation, with detailed animations and pre-recorded live case material to demonstrate key procedural points
- Review troubleshooting using a case-based approach
- Review post-operative care and patient management

DVD Program

Indications for Subcutaneous ICD
Yong Mei Cha, M.D.

Anatomy for the Subcutaneous Implanter
Samuel Asirvatham, M.D.

ECG Screening and Step by Step Approach to the Implant
Paul A. Friedman, M.D.

Trouble Shooting the Subcutaneous ICD
Paul A. Friedman, M.D.

Panel Discussion:
Moderator: Dr. Douglas L. Packer
Panel: Drs. Cha, Asirvatham and Friedman
This program is designed to provide a firm understanding of the cardiac anatomy, patient selection and implantation techniques when using the subcutaneous ICD implantation to manage cardiac rhythm disorders.

Objectives:
- Review the indications and contraindications for subcutaneous ICD therapy
- Review the unique anatomy associated with subcutaneous ICD implantation
- Describe subcutaneous implantation for treatment of cardiac rhythm disorders in a step-by-step manner
- Identify troubleshooting techniques for when device function does not meet expectations
- Discuss post-operative care

Accreditation Statements:
College of Medicine, Mayo Clinic is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

College of Medicine, Mayo Clinic designates this enduring material for a maximum of 3.0 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Evaluation, CME Credit and Syllabus:
Completing the online assessment is required for AMA PRA Category 1 Credits™. The assessment may be taken two (2) times and requires an 80% pass rate. Upon completion of the assessment, you will then be able to generate the pertinent certificate(s) online to save or print.
