COURSE HIGHLIGHTS

Intended and designed for anesthesiology practitioners, orthopedists, certified registered nurse anesthetists, and anesthesiology residents, this course will help attendees learn new concepts in acute pain management and provide better patient care. A group of widely recognized experts in their fields will deliver the morning lectures followed by afternoon hands-on workshops. Faculty will address the upper and lower extremity plexus anatomy, regional anesthesia techniques and practice protocols. Discussion will include trends in peripheral nerve blocks, advantages of regional anesthesia in orthopedics, effective epidural and multimodal anesthesia, single-shot and continuous nerve blocks for upper and lower extremity anesthesia.

COURSE LEARNING OBJECTIVES

Upon completion of this course, participants should be able to:
• Identify the basics and principles behind acute perioperative pain management.
• Apply multimodal approach to pain, including peripheral nerve blocks.
• Discuss the advantages/disadvantages of local anesthetics.

DISCLAIMER

Attendance at this Mayo course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.

CREDIT
