Current and Emerging Strategies in Multidisciplinary Care: Translating Evidence into Best Practices

HYATT REGENCY LA JOLLA AT AVENTINE
SAN DIEGO, CALIFORNIA
MARCH 1–3, 2018

CE.MAYO.EDU/GICANCER2018
COURSE DESCRIPTION
This course will focus on case-based and didactic presentations from Mayo Clinic and other international experts in the treatment of the whole spectrum of gastrointestinal (GI) cancers including esophageal, gastric, hepatocellular, pancreatic, small bowel, bile duct, anal and colorectal, and gallbladder.

The primary goal of this course is to guide practicing physicians on integrating the best and most current evidence into their day-to-day routine care for patients with GI cancers. This course will also bring a practical perspective on how to optimize multidisciplinary care for some of the more complex clinical management decisions in GI oncology including but not limited to, locoregional modalities, the role of minimally invasive procedures and state of the art radiation modalities.

TARGET AUDIENCE
This course is designed for Medical Oncologists, Radiation Oncologists, Surgical Oncologists, GI Surgeons, Gastroenterologists and Hepatologists involved in cancer care, Interventional Radiologists, Pharmacists, Nurse Practitioners, Physician Assistants and Nurses and any healthcare professional involved in the care of GI malignancies.

LEARNING OBJECTIVES
Upon conclusion of this program, participants should be able to:

• Interpret the most up-to-date and practice-relevant data presented at various cancer-related meetings in 2017.

• Integrate evidence-based interdisciplin ary treatment strategies into clinical practice in various fields of medical oncology.

• Determine the usefulness of biomarker-based treatment approaches in oncology.

• Determine the current and future role of immunotherapy strategies in various GI malignancies.

• Select the appropriate treatment strategy for patients with early stage cancers of GE junction, rectum, pancreas and liver.

• Identify ideal patients with hepatobiliary cancers and neuroendocrine tumors that would be candidates for transplant.

• Describe the molecular biology and genetics of colorectal cancers.

• Integrate statistical knowledge into the interpretation of published and presented data.

• Select the appropriate regimens for sequencing therapies across multiple GI malignancies.

Attendance at this Mayo Clinic course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.
REGISTRATION

CREDIT
Mayo Clinic College of Medicine and Science is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Mayo Clinic College of Medicine and Science designates this live activity for a maximum of 15.25 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Other Health Care Professionals: A certificate of attendance will be provided to other health care professionals for requesting credits in accordance with state nursing boards, specialty societies, or other professional associations.

LOCATION AND ACCOMMODATIONS
Hyatt Regency La Jolla at Aventine
3777 La Jolla Village Drive | San Diego, CA 92122
888-421-1442

A limited block of guest rooms has been reserved for attendees at the special group rate of $189/night (USD) per room per night single/double occupancy plus applicable city and state taxes. Make your reservation before the block fills or the cut-off date of February 6, 2018, reference Mayo Clinic GI Cancer Course. Group rates will apply three days prior to and three days after the course dates based on group room availability. Children younger than the age of 18 will stay complimentary. Guest room high-speed internet is also complimentary. Attendees are responsible for their own reservations. For more information and to make your reservations, please visit the course website.

PROGRAM AT-A-GLANCE

Comprehensive program schedule at: CE.MAYO.EDU/GICANCER2018

THURSDAY, MARCH 1, 2018 | NOON – 5:05 P.M.
- Advanced Non-Metastatic Pancreas Cancer
- Early Stage Rectal Cancer
- Early Stage Gastro-Esophageal Cancer
- Locally Advanced Hepatocellular Carcinoma

FRIDAY, MARCH 2, 2018 | 7:00 A.M. – 3:35 P.M.
- Emerging Treatment Strategies in Gastro-Esophageal Cancer
- Emerging Strategies to Optimize Outcome in Metastatic Colorectal Cancer (mCRC)
- Optimizing Outcome in Early Stage and Oligo-Metastatic Colorectal Cancer
- Interpretation of Clinical Trial and Large Databases in GI Cancers

SATURDAY, MARCH 3, 2018 | 7:00 A.M. – 2:35 P.M.
- Emerging Treatment Strategies in Pancreas Cancer
- Emerging Strategies to Optimize Outcome in Hepatobiliary Cancers
- Neuroendocrine Cancer
- Special Lectures
