Eradicating Colon Cancer

A cancer-screening test begins with studies near the Arctic Circle; and leads to a convenient and reliable early-warning system against colon tumors. Currently, more than half of all colon cancers are discovered late in development. This non-invasive test could dramatically change colon cancer detection and outcomes.

Fixing the Broken Health Care System

Are Mayo Clinic's methods transferable? Many of them are - and a new Center for the Science of Health Care Delivery will be making its process information available to medical practices across the nation. The Center enables Mayo to share its historical and new knowledge on how to innovate and validate the best approaches to patient care.

The Genomics of Bipolar Disorder

Mayo Clinic psychiatrists are combining clinical research with the latest in genomic science to find the right medications for individuals with bipolar disorder. The goal is to develop diagnostic tools beyond observation to make an accurate diagnosis and customize treatment to the individual.

[Discovery's Edge](#), Mayo Clinic's online research magazine, highlights stories of leading medical investigators. Many feature stories cover ongoing projects long before they reach the journals. Science writers and medical reporters seeking story ideas will want to review the articles, which span a wide range of conditions and include visuals that can be used in publications.
