This is the 6th Annual Mayo Clinic Hematology Review which will provide a comprehensive review of our current understanding of patient care and evolving scientific study of patients with hematologic malignancies and common benign hematologic disorders. This state of the art course is designed for hematologists, oncologists, nurse practitioners, nurses, pharmacists, researchers, and anyone interested in the diagnosis and treatment of hematology patients.

- Conference will provide a welcoming and broad platform for in-depth discussion and interaction with many of the thought leaders in Hematologic Malignancies and Benign Hematology Disorders.
- Comprehensive and state-of-the-art review of all major hematologic malignancies including:
  - Acute myeloid and lymphoid leukemias
  - Chronic myeloid (MDS, Myeloproliferative, CML) and lymphoid (CLL) leukemias
  - Hematopoietic stem cell transplantation
- Challenging and interactive sessions on pertinent issues involved with the care of hematology patients including:
  - Focused Sessions on Thrombocytopenia Inducing Disorders
    - ITP, TTP, DIC, Autoimmune Disorders
  - Focused Sessions on Anemia Inducing Benign Disorders
    - Hemolytic Anemias, PNH, Autoimmune Disorders
    - Anticoagulation management
    - Consultative Hematology in the Hospital
    - Supportive and Palliative Care
    - Focus on your Practice: Nursing, Pharmacy, Billing and Practice Management Issues
    - Controversies in Hematology
- ASH Highlights: Updates from the 50th American Society of Hematology meeting from 2008 will be highlighted across all topics
