Course Description
This one-day course is designed as a continuing education course for optometry, with a balanced assessment of clinically relevant advances in eye care. A few topics include retinal cases with imaging by Dr. Andrew Barkmeier, an introduction to a new retinal prosthesis, a review of lid lesions, advice on smoking cessation, and pediatric glaucoma.

Learning Objectives
Upon conclusion of this program, participants should be able to:
• Restate knowledge of OCT as it is becoming more common in a variety of optometric practice settings as most optometrists welcome more knowledge on interpreting these complex scans.
• Educate on the technology of new prosthesis retinal systems for blind patients.
• Review eyelid lesions that are benign and those that need to be referred for immediate removal/treatment.
• Introduce a new fitting method to evaluate scleral shape for patients with corneal ocular disease.
• Review cranial nerve palsies that may not frequently present in general clinic.
• Describe the rare condition of pediatric glaucoma.
• Assess the most current and successful glaucoma surgeries.

Attendance at this Mayo course does not indicate nor guarantee competence or proficiency in the performance of any procedures which may be discussed or taught in this course.

Intended Audience
Opticians, Optical Technicians, Optometrists
