A Practical Asthma Workshop for the Primary Care Provider

October 13, 2006
Mayo Clinic Campus
Rochester, MN

Course Description

The Practical Asthma Workshop for the Primary Care Provider is a one day interactive workshop designed to address the management of asthma and related problems. This comprehensive program has been developed by clinical experts with a goal of improving asthma care consistent with national and international consensus guidelines. The workshop will concentrate on specifics of asthma care; addressing issues from how to formulate an asthma action-plan to a 15-minute asthma follow-up-visit. Breakout sessions are planned for more intensive coaching. The workshop will have an emphasis on everyday clinical care confronting the busy primary care provider. The how-to approach and interactive case format will focus on expanding the attendees’ options and care strategies for clinical decision making regarding the patient with asthma. The “Ask-the-Professor” sessions are designed to be informal forums to enable an exchange of views and opinions. Watch for a brochure and register early for a discount. Seating is limited given the format and structure of the workshop.
