TRANSFUSE
INTERDISCIPLINARY FUSION OF EXPERTISE
FOR PATIENT BLOOD MANAGEMENT
MARCH 21–23, 2016
HILTON RIVERSIDE / NEW ORLEANS, LOUISIANA

Jointly provided by Mayo Clinic Department of Anesthesiology, Mayo Medical Laboratories, and Mayo Continuing Nursing Education
CONFERENCE OVERVIEW

This three-day multidisciplinary conference explores current state-of-the-art techniques to manage hemorrhage and hemostatic challenges. The future of blood products, including advances in pathogen reduction and storage will be examined. This is a one-of-a-kind summit organized by leaders in blood management from Mayo Clinic with expert faculty from institutions around the country.

LEARNING OBJECTIVES

Upon completion of this activity, learners will be able to:

- Explain the most recent evidence-based use of transfusion therapies to optimally care for patients
- Discuss the future of blood products as related to pathogen reduction and storage
- Analyze and apply new knowledge to multidisciplinary clinical cases
- Apply the concept of comprehensive blood management to support hospital transfusion needs and reduce inappropriate transfusions

INTENDED AUDIENCE

- Medical Specialists
- Surgeons
- Anesthesiologists
- Pathologists
- Perfusionists
- Hospitalists
- Hematologists
- Pediatricians
- Transfusion Medicine Specialists
- Residents
- Quality Managers
- Nurses
- Blood Management Directors and Coordinators
