

MCF Neuroscience Department Highlights: Nov. 2012 – Feb. 2013

Congratulations to faculty recently earning a combined \$2M in grant awards:

The Alzheimer's Association recently awarded John Fryer, PhD, a two-year grant for his studies elucidating the role of clusterin (CLU) and lipocalin 2 (LCN2) in Alzheimer's disease and normal cognitive function. He has also been awarded a one-year Center for Individualized Medicine-Microbiome grant to study gut microbiota changes as a result of high-fat diet and exercise in adult and neonatal mice as well as microbiota alterations that might occur in a mouse model of Rett syndrome.

Heather Melrose, PhD, has been awarded a Michael J. Fox Foundation LRRK2 Challenge 2013 Award for her efforts to explore the in vivo rescue of dopamine release deficits via kinase inhibition in LRRK2 mutant mice.

Rosa Rademakers, PhD, was recently awarded an R01 grant to investigate the genetic and functional analyses of TMEM106B, SORT1 and TBC1D1 and their involvement in the regulation of progranulin in FTL and ALS.

Yongjie Zhang, PhD, and John Fryer, PhD, will serve as multiple PD/PIs on their recently awarded NIH R21 grant, "Understanding the Mechanisms of TDP-43 Function."

Students and faculty publish significant work in high-impact journals:
